GW Ovens Ecoblanc

Cooking ovens

Application:

Ecoblanc is designed to provide high insulating efficiency in household and commercial ovens.

Description:

Ecoblanc is a thermal insulation felt material made from glass wool fibres, without slugs. It contains a special mineral binder, which prevents any VOC or odour emissions. The product features a special applied support with suitable stiffness and resistance to manual or automatic handling.

Material:

Mineral wool unrisky regarding health according to EUCEB certification. Free of sulfite, chromium and sulphur.

Thermal performances:

Thermal conductivity λ [W/(m.°K)], according EN 12 667

T [°C]	50	100	150	200	250
Ecoblanc	below 0.040	below 0.050	below 0.060	below 0.070	below 0.085

Specific thermal capacity C around 0,85 kJ/(kg.K).

ISOVER

Service temperature:

Service temperature up to 450 °C in continuous service, with stable dimensions.

Fire reaction:

Non combustible, fire class A1, according EN 13 501.

Characteristics / Dimensions / Packaging:

- Thicknesses: 20, 25 and 30 mm.
- Dimensions: Available in roll.
- Possible facing: White glass tissue on one side or both sides.

Rolls wrapped in paper and placed in closed polyethylene bags.

Products must be stored in covered areas.
